AMPLIROLL®
TELESCOPIC AND ARTICULATED JIB

THE ORIGINS

Born in 1992 from an SNCF requirement, the Marrel telescopic and articulated jib was developed for combined Rail-Road transport, **enabling removable containers to be handled, transferred and transported between road and rail.**

This technology has since evolved to meet the needs of many industries, while retaining its DNA: **facilitating the handling and transfer of loads with efficiency and versatility.**

PRODUCTIVITY

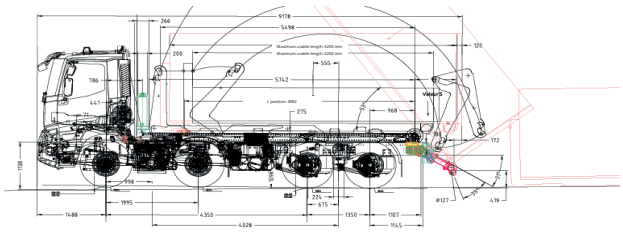

Reduced loading angle
and greater range of container lengths.

ADAPTABILITY

Flexibility in all circumstances thanks to **the optimised approach angle:** facilitates loading in areas with restricted height or even inside a building.

AVAILABLE PRODUCTS

AMPLIROLL® HIGH

S GENERATION — Working height of 255 mm

AL14PA | AL16PA | AL18PA | AL20PA | AL22PA | AL24PA | AL26PA

LP RANGE — Working height of 195 mm

AL18LP-PA | AL20LP-PA | AL22LP-PA | AL24LP-PA
